

The perfect internal communication solution for companies with deskless employees.

Native iOS and Android Apps

✔ Audience Targeting

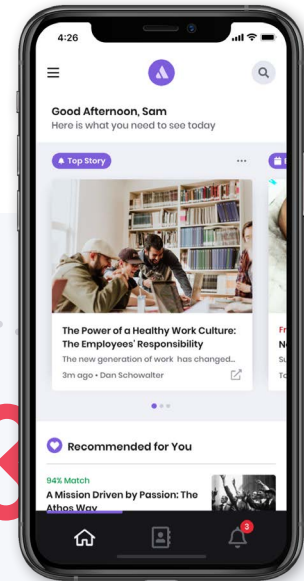

Broadcast integrates with Active Directory, Workday and more — giving you the ability to easily target audiences with content — even push notifications!

✔ Your Brand

The Broadcast mobile app uses your branding and custom links that you can set and change without IT.

✔ Live in Days, Not Months

Broadcast mobile is part of the Broadcast Suite which means you can deploy it in as quickly as 24 hours.

Analytics and Reporting

✔ Cross-Channel

No more copying/pasting from one platform to another. See how employees are engaging with your content across mobile, intranet, email and more — all in one place.

✔ Custom, Shareable Dashboards

With over 18 reporting components, you can build and share custom dashboards based on the KPIs that matter to your organization.
